*The following information replaces the first and seventh paragraphs and the table in the section entitled “Litman Gregory Masters International Fund -Sub-Advisors” on page 36 of the Prospectus dated April 30, 2018, as supplemented:  
 (Changes are in boldface and underlined)*

The International Fund’s **five** sub-advisors pursue the International Fund’s objective primarily through investments in common stocks of issuers located outside of the United States. Under normal market conditions, the International Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the securities of companies organized or located outside of the United States, including large-, mid-, and small-cap companies and companies located in emerging markets. This investment policy may be changed by the Board without shareholder approval, but shareholders would be given at least 60 days’ notice if any change occurs. Each manager may invest in securities traded in both developed and emerging markets. Though there is no limit on emerging market exposure, it is not expected to be a primary focus, and the majority of the International Fund’s assets is expected to be invested in stocks of companies listed and domiciled in foreign developed countries. There are no limits on the International Fund’s geographic asset distribution but, to provide adequate diversification, the International Fund ordinarily invests in the securities markets of at least five countries outside of the United States. In most periods it is expected that the International Fund will hold securities in more than five countries. Although the International Fund intends to invest substantially all of its assets in issuers located outside of the United States, it may invest in U.S. issues on a limited basis, and at times of abnormal market conditions it may invest all of its assets in fewer than five countries.

The following table provides a description of the International Fund’s **five** sub-advisors and their target levels of assets. Asset levels will fluctuate and it is at the discretion of Litman Gregory to re-balance the asset allocations. A detailed discussion of the management structure of the International Fund follows the table.
